originally published in 1962 this book discusses and interprets the main themes of buddhist thought in india and is divided into three parts archaic buddhism tacit assumptions the problem of original buddhism the three marks and the perverted views the five cardinal virtues the cultivation of the social emotions dharma and dharmas skandhas sense fields and elements the sthaviras the eighteen schools doctrinal disputes the unconditioned and the process of salvation some abhidharma problems the mahayana doctrines common to all mahayanists the madhyamikas the yogacarins buddhist logic the tantras

this book comprises francis story s contributions to the two serial publications the wheel and bodhi leaves which belong to his best and most mature writing with its rich and variegated contents this book may well serve as an introduction to the buddha s teachings the buddha once said that his teaching has only one taste that of liberation yet being a teaching of actuality buddhism has also dimensions extending to wide fields of human life and thought some of them are mirrored in the essays of this volume these wide ranging and penetrative writings offer therefore many stimulating approaches to buddhist thought and its application to problems of our time contents 1 hymn for vaishakha 2 the buddha a unique teacher 3 the supreme conqueror 4 the appeal of buddhism 5 the uniqueness of buddhism 6 the four noble truths 7 dialogues on the dhamma 8 the scientific approach to buddhism 9 the buddhist world view in the age of science 10 a larger rationalism 11 of gods and men 12 prayer and worship 13 gods and their place in buddhism 14 cosmological thought in buddhism and modern science 15 expanding universe and steady states universe 16 the magic mountain 17 is there a beginning 18 buddhism and the origin of life 19 divine creation or lawful genesis 20 buddhist meditation 21 buddhist mental therapy 22 buddhist lay ethics 23 the place of animals in buddhism 24 action 25 kamma and causality 26 kamma and freedom 27 collective karma 28 beauty and the buddhist 29 omniscience and the buddha 31 samsara 32 the way of dispassion 33 nibbana

buddhism and its history are the most revolutionary things which happened in the world history buddha and his teaching proved to be an inspiration for many including dr b r ambedkar the history of buddhist thought covers literatures on the buddhist philosophy the book talks about the early sangha literature which comprises the early buddhist corpus available on buddha the relationship between the buddhism and brahmanism is an interesting aspect even though buddhism was presented as a critic of the hindu religion however the important themes that are touched in this volume is the concept of buddhahood bodhisattva concept of voidness and consciousness and the stage of nirvana which is another important aspect in buddhist religion and finally it covers the interaction between buddhism and modern thought

tracing the development of buddhist thought from a primarily philosophical and epistemological point of view this wide ranging study covers a period of more than 2 000 years following buddhism from its homeland india through its expansion into china and japan the diverse historical and cultural settings of buddhism are considered and the significant changes and shifts

in buddhist thought are placed in context with the remarkable degree of continuity that has been maintained included are discussions of early buddhist schools in india and south east asia the differences between the two main branches of buddhism and the development of zen philosophies in japan

originally published in 1971 the essays in this volume cover some of the most important aspects of buddhism and include discussion of such themes as the nature of buddhism buddhist ethics and philosophical concepts buddhism and science the power of mindfulness anatta and nibbana

this introduction to buddhism examines its basic philosophical teachings and historical development setting forth complex and significant ideas in a straightforward and simple style that is easily accessible to the student the author s orientation is philosophical rather than religious or sociological this approach is both the uniqueness and the strength of the work part i outlines the historical background out of which buddhism arose and emphasizes the teachings of early buddhism part ii examines developments in the history of buddhist thought and the emergence of the various schools of buddhism

the four noble truths are well known as the buddha s first and most essential explanation of his enlightened realizations the truths diagnose the human existential crisis suffering and its origin and prescribe a solution cessation and the path to understand the four noble truths is to understand buddhism as a whole in the four noble truths geshe tashi draws on his decades of training in tibetan buddhism to illuminate these truths for a modern audience his respectful engagement with buddhists outside his own tradition and his insights into western culture make this book refreshing it will reward even those already acquainted with the fundamentals of buddhism the four noble truths is the first of six stand alone volumes in the foundation of buddhist thought series

in emptiness the fifth volume in the foundation of buddhist thought series geshe tashi tsering provides readers with an incredibly welcoming presentation of the central philosophical teaching of mahayana buddhism emptiness does not imply a nihilistic worldview but rather the idea that a permanent entity does not exist in any single phenomenon or being everything exists interdependently within an immeasurable quantity of causes and conditions an understanding of emptiness allows us to see the world as a realm of infinite possibility instead of a static system just like a table consists of wooden parts and the wood is from a tree and the tree depends on

air water and soil so is the world filled with a wondrous interdependence that extends to our own mind and awareness in lucid accessible language geshe tashi tsering guides the reader to a genuine understanding of this infinite possibility

the riddles that world causation pose to the human mind lie at the bottom of all cosmological systems of thought in their origins all philosophical attitudes are conditioned by partiality and perspectivism the philosopher s attempted flight towards the seemingly remote kingdom of truth is often aborted by the binding twines of perspectival language thus his insights lose themselves in conflicting contradictory manifestos greek cosmology as it is formally set forth by the pre socratics is a clear example of this weary pilgrimage of mind s embodied vision from angle to angle from perspective to perspective not less is to be expected from the systems of hinduism and mutatis mutandis also of buddhist thought more confined from the very outset to the study of reality as a study of human existence of its awareness of embodiment of its spatio temporal bondage and of its ultimate ontological status buddhism gave rise to truly astounding theories of life world causation the process of buddhist thought as it refers to the nature of the human experience as in the world existence covers a vast range of doctrines from original theories of pluralism and phenomenalism with sectional multifarious and relativistic notions of causality through the unitary conceptions of monistic idealism up to the top of universal integrationism and dialectical totalism

this text brings together the essence of buddhist thought the most important teaching being that spiritual truth is the only guiding principle and narrates and explains fundamental buddhist ideas through a collection of sayings parables and stories compiled under the guidance of monks

pt i sixteenth century translation hazards the zen shock the buddha s progress chaos and the god of zen valignano s lectures and catechism buddhist philosophy god s samadhi pt ii seventeenth century oriental ur philosophy rodriques pan asian religion kircher buddha s deathbed confession the common ground navarrete pan asian philosophy bernier the merger le clerc bernier from pagan to oriental philosophy philosophical archaeology burnet zoroaster s lie jacob thomasius ur spinozism bayle

this new volume from the foundation of buddhist thought series provides a stand alone and systematic but accessible entry into how buddhism understands the mind geshe tashi an english speaking tibetan monk who lives in london was trained from boyhood in a traditional tibetan

monastery and is adept in communicating this classical training to a modern western audience buddhist psychology addresses both the nature of the mind and how we know what we know just as scientists observe and catalog the material world buddhists for centuries have been observing and cataloging the components of inner experience the result is a rich and subtle knowledge that can be harnessed to the goal of increasing human well being

at its heart buddhism blossoms from one source the words and life of siddhartha gautama the buddha chad mercree a lifetime student of buddhist philosophy and meditation reveals in simple language how buddhism can yield personal growth in the modern world because every journey is unique mercree relates his own story as well as the experiences of famous buddhists throughout history to help you apply buddhas principles to your personal path

this book serves as an accessible and reliable survey for students wishing to gain familiarity with the basic ideas of buddhist philosophical and religious thought and with some of the recent research in the field it guides readers towards a richer understanding of the central concepts of classical indian buddhist thought from the time of buddha to the latest scholarly perspectives and controversies abstract and complex ideas are made understandable by the authors clear and engaging style the second edition has been fully revised in light of new scholarship in particular on mahāyāna buddhism and tantric buddhism an often neglected and inadequately understood topic as well as a detailed bibliography this authoritative resource now includes recommended further reading study questions a pronunciation guide and extensive glossary of terms all aimed at helping students to develop their knowledge and appreciation of buddhist thought

here the foundations of buddhist thought series shifts to helping readers progress on the buddhist path by explaining the two truths or ways of viewing reality geshe tashi tsering describes how our perception of reality is obscured or clarified depending on the truth in which we perceive and believe his systematic approach to buddhist thought allows readers to gradually but surely enhance their knowledge of buddhism without feeling overwhelmed

this volume collects important philosophical texts from across the buddhist tradition each text is translated and introduced by a recognized authority in buddhist studies buddhist philosophy provides an introduction to the vast and diverse traditions of buddhist thought through a selection of their most significant texts each classic text is contextualized historically and philosophically with an introduction by leading contemporary scholars making buddhist

philosophy an ideal text for undergraduate courses

what did the buddha actually teach for those seeking an answer to this question and to understand buddhism as an important part of the world s religious and cultural heritage philosophy of the buddha is an excellent introduction and guide the author s purpose is to state the philosophy of gotama the man himself by a careful study of the original records he cuts through layers of devout and theological speculation much as higher biblical criticism has done in christianity and presents clearly and concisely the real humanly significant roots and permanent values of many aspects of buddhist thought
